Local Traffic does not include optional local calling (i.e., optional rate packages that permit the end-user to choose a Local Calling Area beyond the basic local exchange serving area for an additional fee), referred to hereafter as "optional EAS".

1.97 Information Access Traffic

Information Access Traffic, for the purpose of this Agreement, is traffic (excluding CMRS traffic) that is transmitted to or returned from the Internet at any point during the duration of the transmission between the Parties. The term Information Access Traffic does not include transmission of voice telecommunications traffic regardless of whether it is delivered to an ISP and regardless of whether it is carried at any point on facilities via Internet protocol. Information Access Traffic is not subject to reciprocal compensation between the Parties.

1.100 Virtual NXX Traffic (VNXX Traffic).

As used in this Agreement, Virtual NXX Traffic or VNXX Traffic is defined as calls in which a Cheqtel's end user is assigned a telephone number with an NXX Code (as set forth in the LERG) assigned to a Rate Center that is different from the Rate Center associated with the Customer's actual physical premise location.
